Kite II Harness

This climbing harness has been designed to provide increased access to ropes courses for participants with limited physical and sensory abilities.

Features:

- More support and options for positioning than conventional chest and seat harnesses
- Sitting angle can be easily adjusted to meet user needs and specific activity
- Multiple attachment points including new attachment points on shoulders and top of legs
- Internal one piece foam liner, lumbar pad and distal pads for postural support
- Additional pressure sore relief system with additional stiffeners for extended hanging
- Available in Small (5 yrs), Medium (10 yrs) and Large (15+ yrs)
- Only available harness designed for accessibility certified to a harness standard (EN 1497 standard for rescue harnesses)

The Caterpillar

This neck support system can be used with the Kite II climbing harness. It's modular construction allows it to be tailored to the individual providing support where needed.

Features:

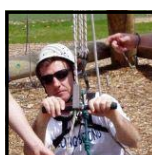

- Stretchable neoprene outer
- Modular inserts for personalising
- Additional velcro padded spots to fine tune the support in small areas
